

GHASSOUL

with Moroccan Lava Clay

NEW SPA & WELLNESS EXPERIENCE

The GHASSOUL is used in Hammam as well as in bathrooms.

Mybondo's GHASSOUL is a clay called saponifère, because it has a natural foaming power due to the presence of the silicate of magnesia.

Due to the natural foam in it, the GHASSOUL is considered as a very good anti-degreaser. However it is not going to attack the skin structure.

The GHASSOUL is used all over the body, or on hair as shampoo. To use, pour the product in warm water and NOT HOT, in order to preserve the quality of vegetable extracts added.

Positiv effect to use black soap:

- eliminate dirt (in the pores of the skin)
- high absorbing power (eliminate toxins)
- purification
- relaxation effect
- outstanding softness after use

Ingredients:

- organic herbal extracts
- maroccan lava clay
- essential oils (Lavendel & Latifolia)

Enjoy your Organic Product and feel always good
